# Stocks of Grains in All Positions

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY
NOV 18 1966
CURRENT SERIAL RECORDS

October 25, 1966

## WHEAT AND FEED GRAIN STOCKS LOWER

All wheat stocks on October 1 were 16 percent less than a year earlier and were the lowest October 1 holdings since 1952. Durum wheat holdings were 20 percent under the level of a year earlier but 13 percent above average. Stocks of the four feed grains totaled 58 million tons--20 percent below last year and 36 percent less than average according to the Crop Reporting Board. Stocks of each of the feed grains were below a year earlier and average with the combined October 1 tonnage the lowest since 1954. Rye stocks were at the highest October 1 level since 1955. Flaxseed holdings were 18 percent below last year but 5 percent above the October 1 average.

All wheat in storage on October 1 totaled 1,440 million bushels--the smallest October 1 stocks since 1952. Holdings were 16 percent less than a year earlier and 31 percent below the October 1 average. Most of the decline from last year occurred in off-farm stocks. Off-farm stocks, at 899 million bushels, were 22 percent below a year earlier and the lowest in 14 years. Farm stocks totaled 541 million bushels, 4 percent below last year but 16 percent above average. About 30 percent of the total October 1 stocks were either owned by the Government or under Government loan compared with 47 percent a year earlier. Disappearance from all storage positions during the July-September quarter is indicated at 391 million bushels--down 10 percent from the same period a year earlier, but 10 percent above average.

Durum wheat stocks in all storage positions on October 1 totaled 98.2 million bushels, 20 percent below a year earlier but 13 percent above average. Farm stocks, at 60.6 million bushels, were 19 percent below a year earlier. Off-farm holdings, at 37.6 million bushels, were 22 percent less than on October 1 last year. Disappearance during the July-September quarter was indicated at 17.4 million bushels, up 34 percent from the comparable period in 1965.

Rye stocks of 38.0 million bushels in all storage positions were the largest October 1 holdings since 1955. Farm stocks totaled 15.3 million bushels, 16 percent less than a year earlier while off-farm holdings of 22.7 million bushels were 28 percent larger than on October 1 last year. Disappearance during the July-September quarter was 8.2 million bushels compared with 10.2 million bushels during the same period last year. Nearly 27 percent of the total stocks were either Government owned or under Government loan compared with 26 percent a year earlier.

UNITED STATES DEPARTMENT OF AGRICULTURE
Statistical Reporting Service
GrLg 11-1 (10-66)
Crop Reporting Board
Washington, D. C.

Old corn carryover stocks on October 1 totaled 866 million bushels--26 percent less than a year earlier, 48 percent less than average, and the smallest October stocks since 1953. Indicated disappearance of 948 million bushels during the July-September quarter is 24 percent larger than for the same months in 1965 and 10 percent larger than in 1964.

Stocks of old corn on farms, at 540 million bushels, were 11 percent less than last year and 3 percent less than average. Corn under Government loan accounted for 56 percent of the October 1 farm stocks, compared with 65 percent a year earlier. Corn held in off-farm positions totaled 326 million bushels, 42 percent less than last year and the smallest total since 1952. About 76 percent of the off-farm stocks were owned by CCC, compared with 96 percent a year earlier.

Oat stocks in all positions on October 1 totaled 861 million bushels, 9 percent less than a year earlier and 11 percent below average. On farm holdings were below both last year and average while off-farm stocks were above. About 12 percent of all stocks are CCC owned or under Government loan. Disappearance during the July-September quarter, at 298 million bushels, was the same as the record low set last year for the comparable period.

Barley stored in all positions on October 1 totaled 388 million bushels, 3 percent less than a year earlier and 12 percent below average. Holdings were below those of October 1 a year ago in both farm and off-farm positions. About 5 percent of all stocks were either owned by CCC or under Government loan. Disappearance during the July-September quarter, at 113 million bushels, was the same as a year earlier but 5 percent below average.

Sorghum grain carryover stocks in all positions on October 1 totaled 393 million bushels, 31 percent less than at this time last year and 40 percent less than average. About 86 percent of all holdings were located in off-farm positions and virtually all stocks were either owned by CCC or under Government loan. Disappearance of sorghum grain from all storage positions during the July-September quarter was at a record high of 142 million bushels. This compares with a disappearance of 92 million bushels during this period last year.

Flaxseed stocks in all storage positions on October 1 totaled 29.0 million bushels--18 percent less than a year earlier but 5 percent greater than the 1960-64 average. Of the total, 10.0 million bushels were stored on farms and 19.0 million bushels were in off-farm positions. Current stocks indicate a disappearance during the July-September quarter of 9.8 million bushels from a supply of 38.8 million (carryover of 15.3 million bushels plus production of 23.5 million bushels). This compares with a disappearance of 10.8 million bushels during the same period last year and the average of 7.2 million bushels. Crushings during the quarter are estimated at 4.8 million bushels and 2.8 million bushels are estimated for export.
